Abstract: Education is a huge point in contemporary societies. Education has several advantages for everyone. It teaches us how to boost critical thinking, how to make a wise decision and how to notice the difference between good and bad. Also, it creates bright future for people and to have many opportunities for getting valuable knowledge. Moreover, Education grants people a unique status in their own society.

Key words: Education, bright future, tolerant society, valuable knowledge, Educated people, happy life, opportunities, financial point..

INTRODUCTION

1.1 Education:

Education is one the most critical part of our life. It teaches us how to increase critical thinking, how to make a wise decision and how to notice the difference between good and bad . Moreover, it creates bright future for people and to have several opportunities for acquiring knowledge.

Education gives us awareness of the world around us. By thw help of education, we can broaden our horizon. In addition to this, education develops human personality, thoughts , dealing with others and prepares people for life experiences.

2.1 Importance of Education in our society:

Education is a vital part that plays big role in the industrialised world. The importance of education in society is demonstrated by the facts that it creates opportunities for cultivating knowledge and skills that are literally improving the world. It is responsible for the growth of civilization as we know it. Besides, Education aids people teach others manners, moral, spiritual, ethics and aesthetics in each society.

DISCUSSIONS

The role of education are – 1. Education helps to build a better society. 2. Education teaches us for the lessons of humanity. 3. A more tolerant society. 4. Education decreases violence and crime. 5. Education helps to make our life happy and stable. 6. It makes us more confident. 7. Education makes the world a safer and more peaceful place. 8.It turns your dreams into reality. 9. Education is the key to success in the future.

1. Education is being used to build a better society.

Education is important in all areas of society, and is more accountable for the development of the country. Modern society is built on education, which is visible in several ways. In fact, education helps us become a useful member of the society. An educated member certainly has a valuable opportunity to contribute to his community. Education helps us become an active member of the society and participate in the lasting changes and developments.ⁱ

2. Education teaches us for the lessons of humanity.

As you know, there are some differences between educated and uneducated people. An educated person is open-minded, and they have a different thought about life. They see the world in bright colors. But, an uneducated person's mentality is narrow-minded and sometimes, they see the life with negative sides.

By the way, we can broaden our horizon with education (knowledge). It helps us to be a real human in the life. Furthermore, it is said that “**If you educate a man; you educate a man, but if you educate a woman; you educate a generation**”.ⁱⁱ I think that this is true. Because, a male person only educates a man, but women spread their knowledge to all people which are around them and also they are always busy with upbringing the child.

3. A more tolerant society.

I think, every country needs for education to build a tolerant society. Also, one of the most creators of tolerance is education.

Helen Keller said that “The highest result of education is tolerance”.ⁱⁱⁱ According to her quote, as we try to learn something or to get education, our tolerance gradually rises step by step.

4. Education decreases violence and crime.

Education holds some purposes that affect the people, one of which is the reduction of crime percentages in each country. Education does not just teach academics however rather aid to improve children's social skills, behaviour and responsibility at a young age.

From my point of view, educated people never become a criminal with bad behaviour such as a sticky finger, scoundrel or killer. If there is high quality of the education, people are more likely not to commit any crimes.

5. Education helps to make our life happy and stable.

Education provides us with a stable and happy life when we are educated. Because, education provides us with the ability to think good and bad. Due to education, a person can get a job to survive in life. When it comes to financial point, we can find easily a suitable job, if we are educated. If you are educated, you are well aware of your rights, the law and your responsibilities towards the society. Therefore, education is an important factor which contributes in social harmony and peace.

Albert Einstein said that “The more I learn, the more I realize how much I don't know”. The more a person learns, the more they try to learn more and master it more deeply. I think that a person learns new things, their horizon on life changes in a positive way, and they can feel happiness even from simple things in life. Moreover, learning new things and also education gives us enjoyment.

6. Education makes us confident.

Just for once we start getting into the swing of our new skills, our self-esteem blooms - as we surprise ourselves with what we are capable of. Exactly, our educational degree is also considered as a

proof of our knowledge by many people. The more educated we are, the more we feel free in front of others. Furthermore, there are a lot of thoughts about this point by some writers and psychologists. One of them is Vanessa King, positive psychology expert at **ACTION FOR HAPPINESS**. She says “ Learning can help us build confidence and a sense of self- efficacy. It can also be away of connecting with others too”. Actually, the mind of educated people is clear and fluent. They can solve any challenges in life and and educated people have higher self- confidence rather than uneducated people. In short, being educated is undoubtedly being self-confident and flourishing in life.

7. Education makes the world a safer and more peaceful place.

Education is a key that unlocks the door to a good life. If we want to achieve peace and live in the world with less violence and poverty, it must be done through education. A more peaceful and wealthy life is within humanity's grasp and attempt.

8. It turns our dreams into reality.

Everyone has a dream, though it takes a special person to struggle, making a dream come true. Some people want to travel or making new friends with foreign people. Possibly, education is one way of reaching people’s targets. By the way, we can become a person that we want to be through education. Maybe, we want to be a famous people or want to become an extremely successful and lucky person who is respected and admitted by people. Well, the key to all, this is education. For example, a few years ago, I really wanted to enter the University and I wanted to be a good and active person in our society. Also, I achieved it by education.

9. Education is the key to success in the future.

Malcolm says that “ Education is the passport to the future, for tomorrow belongs to those who prepare for it today”. Actually, we should get education to success in the future without waiting tomorrow.

Education is a key factor to success in life. It helps shape one’s life and career and provides us with the skills necessary to succeed. However, basic education remains inaccessible and a luxury for many. And, more so higher education. A college degree is a gateway to a respectable job and career. But unfortunately, this is beyond the reach for many even today. It gives us knowledge of skills and ethics that has been there in the world which we learn as it helps us progress further. Education is a part of our life where one can not only learn, but also share their knowledge with others.

CONCLUSION

As we discussed above, there are a lot of positive traits of having education; such as having a good career, having self-confidence, to build a better society, to be happy, to achieve the goals and in short, to success through person’s life. Thus, Education polishes our mind, strengthens our thoughts and improves our character and behaviours toward other people. Education is also simply the soul of the society as it passes from one generation to another.

All in all, Education is the basic factor of the perfect life. In conclusion, education is important in everyone life. Although there are many obstacles for poor people to have education, there should be application of effective solution for the problem of education through which poor people can light their life with education. Education is important to everyone as it gives shape to people’s life; it affects how we act, think, responds and gives path to life. There is always a solution for any problem

if anybody truly want to get rid of that problem. It is not easy to have higher education but it is not impossible to get it. Whether we know its benefits or not, it is so crucial for our happy life.
