

## Scientific and Political Approaches in the Period of the Russian Empire from the Surface of the Neighborhoods of Samarkand

Gadayev Amon Olimjonovich

QarDU independent researcher

**Annotation:** This article provides an opinion on the location, geography, ethnic composition of neighborhoods in Samarkand in the second half of the XIX - early XX centuries on the resources of the Russian Empire. During the period under study, scientific concepts of the military conquest of the city of Samarkand and the need to conduct scientific research for the use of the territory for imperial purposes were also included. The characteristics of the data of this period are analyzed. The data provided by tourists and research scientists of the imperial period are summarized.

**Keywords:** Empire, neighborhood. Ethnos, ethnic composition, source, scientific research.

**Introduction:** Russian Empire the city of Samarkand during to himself special administrative to units divided though, anyway local population by used destination names \_ preserved remained. This is the empire administration initial in years local the conditions good that he did not know and their internal to work interference empire for unpleasant circumstances cause release possible about thoughts with explain can \_ In addition, the Russian Empire initial years Created documents and from commands It is understood that the administration own management mode yet complete to strengthen unachieved, insignificant reasons with also local of the population waiting often \_ stand up cases prevention get necessity old toponymic neighborhood names preserved to stay of reasons one was \_ Therefore, the city of Samarkand manage in the process local population old order according to manage preserved will remain. This is our opinion of the city of Samarkand learning in order to Created empire to the period about statistics documents also prove it.

Samarkand city administrative in management of neighborhoods place good understand enough management apparatus officials of the city old neighborhood organizations save the rest Samarkand province in place organize done Zarafshon district (1868) and his in place organize during the Samarkand region ( 1886). done increased in studies XIX century of the city to their heads come tulik formed six gate and to them belongs to neighborhoods name note will be done. However, the Russian Empire not only of Samarkand, but also of the khanates all in the regions their own invasion plans disguise for of the population inferior to the part relatively themselves deliverer as they showed

Empire to the period about statistics in collections this in the city of Samarkand Khoja Ahror, Suzangaron, Paykabad, Qalandarkhana, Jews neighborhood of names appear to be above given our thoughts confirms. Because that 's it until time city to history about in sources of the city Jews lives part concept used as a separate neighborhood not brought. This is the reason their the number lack of was. That with together, this information empire by serious to study entered and this in progress there is balance to break, " to be throw away, rule do " slogan based on local population and in the region living coming inferior nations between conflict that an attempt was made to shows.

Turkestan land learning and that's it basically him raw material to the base rotate yet Medium Asia khanates conquest without being standing up started \_ Medium of Asia cheap raw material var us goods for sale comfortable market was sent to Nicholas I (1825-1856) by Major-General Verigin as early as 1826 in the letter statement done \_ Your tax is in the letter own thoughts Russian products quality low for Europe in the markets withstand competition \_ not getting and them sell for Russian to their products competition do it can't get Medium Asia very important said expressions with explains. Samarkand is also mentioned politics as a result out of consideration outside won't stay Samarkand city learning Khans conquest from being done before started though, him continuously and systematic respectively learning Zarafshon of the district structure with started \_ Zarafshon district the city of Samarkand to its head General Abramov each bilaterally learning task loaded. The goal of Turkestan central part countable, name to legends has become of Samarkand economic appropriation and him empire interests subjugate was \_ For this purpose, General Abramov Fergana the valley studying ( 1868-1870) APFedchenko in 1870 of Samarkand mountainous part has been To Iskandarkol Junatadi. Russian Empire period embassy and espionage based on collected in the data Iskandarkol of Turkestan precious General Abramov that it is indicated as a part rich in minerals effort \_ \_ reason was \_ Ferghana and of Turkestan western in the part geological search research their work take to go as a result region population, ethnography, geography and history to rich experience on have A. P. Fedchenko's to be sent this from expedition big results expected means \_ However, the empire period in the sources A. P. Fedchenko's To Iskandarkol organized expedition and his results in particular sure data not quoted. This the process imperialism character with explain can \_ This is it the process is also a period of researchers scientific to their research basis it happened

Empire Government of Samarkand residents, their training research on the subject organized. This is it population of Samarkand in the period main part do not water farming with engaged in, big to the experience have was \_ of Samarkand plant fields volume and that's it with together village economy research reach In 1871, Professor A. Petsol'd is brought. A. Petsol'd studies basically village economy with depends although his \_ information research for belongs to aspects many. Including his Samarkand city in research and his counties with depends toponyms many is cited [8;4]. With that together, his scientific in their research not only the city of Samarkand perhaps, his Uezds are also detailed will be lit. A scientist studies let's call it detailed cause, his information print publication matured and each one field according to data separately in the form given. Neighborhood, guzar and of villages city with intermediate distances the first times sure in the form it is mentioned.

**Conclusion:** to research conclusion as to say maybe in history Medium Asia neighborhoods about data and their analyses is brought. This analyses and from the conclusions of neighborhoods organize to find what because of in cities said enigmatic question surface will come Humanity own society builds since, at first tuda, stretch clan, tribe and to the state founded \_ Statehood composition village and from cities consists of it happened Villages from the city population number lack of and series aspects with separate stood up In the city population number increase them manage in the process series problems surface bring started \_ For this reason cities strength and to the neighborhoods divide started \_ To these divisions while industry, kin - seed production, ethnic content basis by doing received \_
